ZIRCAR Ceramics, Inc. is a New York, USA based manufacturer and international marketer of a wide range of engineered high temperature materials. With a 40 year history as a producer of some of the most advanced ceramic fiber-based thermal, electrical and structural insulation materials, the spectrum of markets served and the depth of our experience and expertise in our field is tremendous.

Product Forms Include:

Rigid Insulation Products:
Boards, Cylinders, Custom Formed Sizes and Shapes, Precision CNC Machining.

Flexible Insulation Products:
Papers, Blankets, Textiles in custom die-cut shapes, sheets, partial and full rolls.

Cements, Rigidizers & Moldable Products: Standard and Custom Bonding and Coating Cements, Mastics and Moldables.

Furnace Building Accessories:
Heating Element Holders and Electrical Straps, Hearth Plates, Ceramic Reinforcing Hardware.

Furnace Insulation Assemblies:
Custom Engineered & Assembled ZIRCAR Ceramics Insulation Systems - makes furnace building easy!

Heating Elements:
MoSi₂ & Resistance Wire, Custom Fiber Insulated Heaters.

Markets Served:
Furnaces: Rapid Cycle with Temperatures to 1825°C.
Aerospace: Radome and Nozzle Insulation.
Glass & Ceramics: Thermal Treatment and Sintering.
Crystals: Growing and Annealling Furnaces.
Scientific Analytical Devices: Insulation and Heaters.
R&D: Corporate, Government and Academic Material Science Research.
Many More!

Thank You So Much!
Everyone at ZIRCAR Ceramics thanks you, our customers, for your business. We also thank Mr. Bernie Hamling, founder (1974) of ZIRCAR Products, Inc., for giving us the opportunity to grow our third generation company and to serve so many satisfied customers.

Mr. Bernie Hamling
High Temperature Fibrous Ceramic Materials  
Thermal, Structural & Electrical Insulation

Rigid Products
ZIRCAR Ceramics offers an extensive range of cost effective high performance rigid insulation products - many that outperform all others - hands down!

$\text{Al}_2\text{O}_3$ products with legendary heritage of high performance include: SALI, SALI-2, ZAL-45, AL-25/1700 - optimum densities and low CTEs for low thermal conductivity, excellent hot strength and long life to 1825°C.

$\text{Al}_2\text{O}_3$-$\text{SiO}_2$ products include an extensive range of engineered combinations of high purity refractory ceramic fibers and inorganic refractory binders in many densities and sizes to temperatures to 1420°C.

$\text{SiO}_2$-$\text{CaO}$-$\text{Mgo}$ “Soluble” fiber products give customer an extended range of products from which to choose - to 1200°C.

Flexible Products
Polycrystalline $\text{Al}_2\text{O}_3$ fiber is used exclusively in ZIRCAR Ceramics’ flexible $\text{Al}_2\text{O}_3$ paper and blanket products. $\text{Al}_2\text{O}_3$, $\text{Al}_2\text{O}_3$-$\text{SiO}_2$ and $\text{SiO}_2$ textiles are also available.

$\text{Al}_2\text{O}_3$ Paper Types APA-1, APA-2 and APA-3 are manufactured of shot free 1650°C fiber available in a variety of sheets and rolls.

$\text{Al}_2\text{O}_3$ Blanket Types NMB and NAB are uniquely strong mechanically needled blankets with useful properties to 1600°C.

$\text{Al}_2\text{O}_3$ Textile Type AS-7M retains 100% of its strength to 1200°C.

Multi-layer 1700C rapid cycle furnace insulation systems made of ZIRCAR Ceramics’ Alumina Type SALI, Alumina Type ZAL-15, Alumina-Silica Type ECO-1200B provide clean, long lasting furnace environments - as required in applications involving the heat treatment and sintering of specialty glasses and advanced technical ceramics.

Type ZAL-45 exhibits high strength, fine texture to 1600°C.  
Type Uniform-A1 made in 30” x 60” x 3” format to 1260°C.

$\text{Al}_2\text{O}_3$ Paper Type APA-1 and $\text{Al}_2\text{O}_3$ Blankets Types NMB and NAB are flexible insulation products offered in sheets, partial and full rolls.

Type APA-3 - 0.012” thick rigidized sheets.  
Type AS-7M super strong to 1200°C.  
Type NMB Blanket Modules to 1600°C.

Cements, Rigidizers, Moldables

ZIRCAR Ceramics' wide range of Cements, Rigidizers and Moldable products enable customers to bond, coat and harden all varieties of ceramic fiber based products.

Al$_2$O$_3$ Rigidizer/Hardener Type AL-R/H and Al$_2$O$_3$ Cements Type AL-CEM and NEW Type AL-CEMXT are ultra high purity products, bringing utility to bonding, coating and hardening applications with temperatures to 1800°C.

SiO$_2$ Rigidizer Type SI-RIG is an ammonia stabilized colloidal silica used to harden the surfaces of fibrous ceramic materials.

Al$_2$O$_3$-SiO$_2$ Cement Type AS-CEM works to significantly harden and reduce particulate generation to temperatures of 1260°C.

Al$_2$O$_3$-SiO$_2$ Moldable Type AX-Moldable forms a very strong bond when building fiber board structures.

An appropriate application of a coating cement or rigidizer, such as AS-CEM on AXHTM (shown above) will contribute to enhancing the strength, hardness and relative cleanliness of ceramic fiber products.

Uniform-A1 tundishes bonded with AX-Moldable Cement. AL-25/1700 BIG BLOCKS laminated with AL-CEMXT.

Precision CNC Fabrication

Five CNC Milling Stations, a fully equipped finishing department working two shifts a day, 5 days a week - means thousands of precision cut parts for a very large number of satisfied customers.

In addition to machining our own products we are experienced in machining other materials including: Calcium Silicate Cement Boards, Microporous Silica Insulation and Refractory and Insulating Bricks.

Contact ZIRCAR Ceramics today for a quote on your next custom insulation requirements.

Engineered Insulation Assemblies

ZIRCAR Ceramics works very closely with OEM Furnace Builders and end user alike on the design and fabrication of complete preassembled insulation assemblies.

This vertical crystal growing furnace insulation assembly is constructed of a layered system of SALI, ALC, ASH - to 1700°C.

This assembly is used to grow Carbon Nanotubes at 1600°C.

Please visit our e-commerce enabled website to see our complete technical library and to purchase standard items online.
